

Turning device on

Use small included screw driver to move the switch as shown in the pictures. Be careful not to touch the circuits with the metal tip. Just the switch

Charging battery

Remove the 4 cover screws.

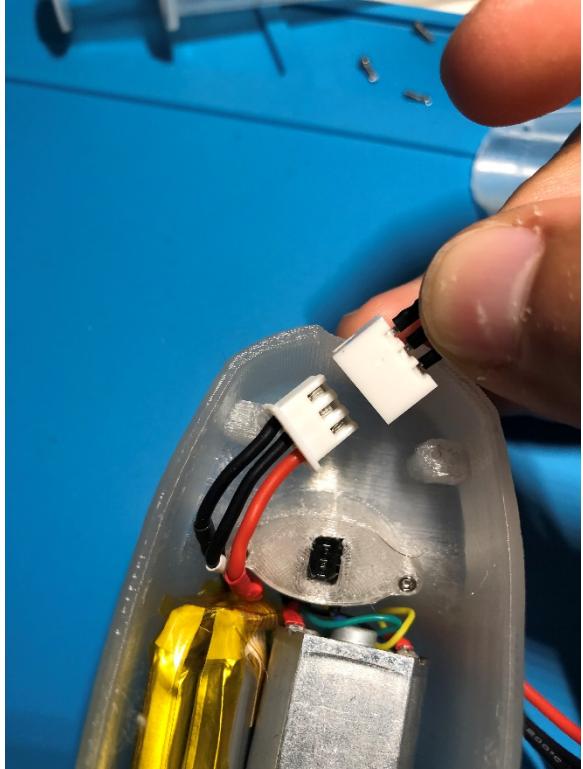

Use tweezers to help removing the screws

After all screws are removed, use tweezers to help remove the cover as shown in the picture.

Connect cable extension, be careful not to pull cable and battery out.

Connect other side of the cable to the charger and wait until all lights are green. (Check charger instructions)

Carefully place the cover again, making sure cables or connector are not being pinched.
